PROJECTS

- Voice assistant using Python**
Python And Python Library
It is built using python library .I have used Google speech recognition engine and microsoft voice to build this project.
- Online medical system**
Java, Dbms, Html, Css
Using this system one can reserve their appointment with any doctor they want within the hospital. It shows every detail of the doctor how much experience he has, field of experience etc.
- two player tank game using java**
java
It is a two player simple tank game. There is only one level and it is a Pixelate game.
